(54) ELECTRONIC BALANCE SYSTEM FOR COUNTER SALES

(57)Abstract:

PROBLEM TO BE SOLVED: To provide an electronic balance system for counter sales which automatically sets the merchandise data of fetched merchandise in an electronic scale.

SOLUTION: This system is provided with: a transmitting means which is arranged in accordance with each displayed merchandise and transmits the merchandise data of the merchandise to its vicinity; a storage unit which is carried by an operator, receives the merchandise data from the transmitting means and stores the merchandise data when the operator fetches the merchandise and also transmits the stored merchandise data to the vicinity; a receiving means which is arranged to the scale and receives the merchandise data transmitted from the storage unit when the operator places the merchandise on the measurement pan of the scale; and a controlling means for setting the merchandise data to the scale on the basis of the received merchandise data. The storage unit is attached to an arm of the operator by a wristband.
